

AYANA RENEWABLE POWER PRIVATE LIMITED (ARPPL) and its SPVs manages Quality, Health, Safety and Environment (QHSE) responsibilities as a priority. We are committed to continually improve our QHSE performance and manage QHSE risks associated with our business activities, product and services through providing alternative sustainable and economical energy to customers through investment in renewable energy technologies.

ARPPL and its SPVs will maintain a QHSE management system and integrate QHSE considerations in to all aspects of ARPPL business operations by implementing the following policy which aims to prevent accidents, incidents and Occupational Illness to people and the environment and deliver customer satisfaction.

ARPPL and its SPVs will;

- Provide management accountability and leadership in directing and delegating of responsibilities for ensuring QHSE actions are performed.
- Plan QHSE management actions using a risk-based approach by determining risks and opportunities that need to be addressed related to business aspects, compliance obligations, other issues or need and expectation of interested parties and determining effective risk mitigation and control measures.
- Clearly define QHSE roles, responsibilities and accountabilities and supporting by ensuring adequate and competent resources are provided.
- Identify adverse hazards, sources, situations or acts with the potential to cause harm to people or the environment or in terms of human injury, ill health, adverse physical and mental condition arising from and/or made worse by work or an activity related to ARPPL operations.
- Use organizational knowledge based on lesson learnt from success and failure, results of improvement processes, product and services, external sources, knowledge from customer or external service providers, incident investigations etc. to drive continuous improvement.
- Build, operate and maintain facilities in a manner that safeguards people, property and environment.
- Develop procedures, operational plans and controls, establishing criteria for process, acceptance of product and services, determining resources needed to achieve conformity of product and service requirements.
- Establish measurable QHSE performance indicators, objective and targets, controls on non-conforming out-puts and adhere to requirements of product and services.
- Creating, updating and controlling documented information.
- Monitor, measure, analyze and evaluate applicable and measurable performance indicators, objectives and targets.
- Review and evaluate operations to measure progress and ensure compliance with this policy via periodic system audits, identification of non-conformities, improvement opportunities, corrective and preventive action plans and management review. Make subsequent changes to the QHSE management system where necessary.
- Provide a timely response to accidents or other emergency situations to mitigate adverse impact on people, environment, asset and reputation. Adopt a philosophy of accident and incident prevention in the first instance.
- Ensure effective internal and external communication, participation and consultation on ARPPL operations. This includes maintaining a well-functioning community grievance mechanism.
- Comply with applicable legislation, regulations and other requirements applicable to business and periodic evaluation of compliance obligations.
- Ensuring that changes or updates are carried out in planned manner when organization determines the need for change to the QHSE management system.
- Maintain a focus on customer need and satisfaction.
- Educate, train and communicate to employees and contractors, to be aware of, and understand QHSE risks associated with their job scope and take responsibility and be accountable for environmental protection, prevention of ill health, injuries accidents and impacts to colleagues and the community when working on behalf of ARPPL.
- Periodically communicate the principles of this QHSE policy to interested and relevant stakeholders.
